2018-2023: REALISED LSAP PROJECTS

Maintenance and improvement of **flood protection measures** and **all pumping stations**.

Reclassification of land on “Lohmühle” into **developable land** for “Bâtiments et équipements publics” (zone BEP) for the **installation of additional flood protection measures** and a pumping station, vital during extreme weather conditions.

Installation of **photovoltaic systems** on the “ZANO” water tank, the “Musée National d’Histoire Militaire”, the “Al Schwemm” changing rooms, the municipally owned “Ciné Scala” cinema complex and the “Service technique”.

Planning of **further photovoltaic installations** on the “Gare” car park, “Building 28, route d’Ettelbruck” and “Al Seeërei”.

Management of community forests in accordance with ecological criteria (FSC certificate).

New tree planting and maintenance throughout the municipality.

Creation of a **tree cadastre**.

Preservation of the construction-free hills around Diekirch.

Expansion of **LED street and path lighting**, and conversion to LED lighting in various municipal buildings.

Specifications of water protection zones to **preserve the quality of drinking water** from the municipality’s own springs.

Maintenance and **expansion of the nature and adventure park** “in Bedigen”.

Annual sheep grazing of the “Spidolswiss” area.

Modernisation of waste disposal with **cost-effective waste separation**.

Co-financing of the new, inter-municipal “Bleesbréck” sewage treatment plant.

Further **expansion** of activities at the “Holdäer” environmental centre.

Continuous **expansion** of the municipality’s **district heating and gas network**.

Continuous modernisation of the municipal electric grid.

Promotion of **green space installations on building roofs** for better air quality.

Introduction of subsidies for private individuals:

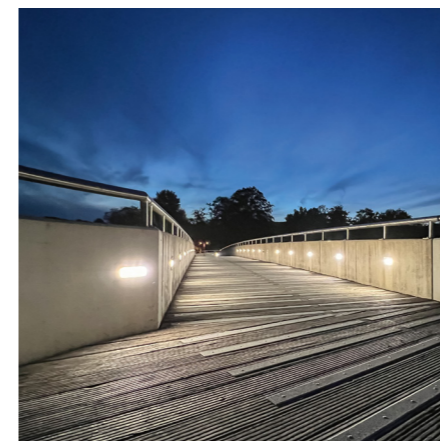

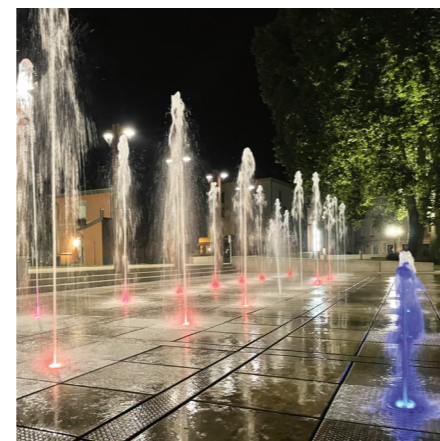

- Purchase of energy-saving **household electric appliances**,
- Purchase of “**Pedelec25**” and classic bicycles,
- **Insulation work** on facades and/or roofs on existing buildings,
- **Renaturation** of sealed front gardens at private houses,
- Installation of **photovoltaic systems** on private houses,
- Installation of **heat pumps** during conversion and renovation work.

Financial contribution by the municipality in the company “Wandpark Nordenergie”.

Installation of **electric charging stations**: “Seeërei” car park, “Place Goethals”, “ZANO”, “Gare” car park, “Promenade de la Sûre”, “rue Merten”, “op der Meierchen”, “Esplanade” car park and the “avenue de la Gare”.

Gradual **renewal of the municipal vehicle fleet**, also with electric vehicles, as well as the purchase of electric scooters for the “Agents municipaux”.

“**Zéro Mégots**” project to reduce pollution from cigarette waste.

2024-2029: LSAP IDEAS, PERSPECTIVES & PROJECTS

Construction of an **animal shelter**, as well as a **wild animal care station**.

Re-evaluation and, if necessary, complete renovation/reinforcement of all existing flood protection measures.

Installation of additional devices for flood protection and **protection against extreme weather conditions** on “Lohmühle” to improve the residents’ safety in the “route de Gilsdorf” and in the “Quartier Sauerwiss”, as well as in the village of Gilsdorf, in the neighbouring municipality of Bettendorf.

Establishment of a **play area for dogs**.

Further energy-efficient modernisation and expansion of the various municipal services.

Further conversion to **LED street and path lighting** on municipal roads.

Substantial investments to build wind turbines, more photovoltaic plants and all other renewable energies.

All wind turbines approved for the company “Wandpark Nordenergie” and thus in compliance with the legal requirements must be built as soon as possible.

Continue to promote **green space installations on building roofs** to improve air quality.

Preservation of the **development-free hills** around Diekirch.

Maintenance and expansion of the **nature and adventure park “in Bedigen”**.

Conversion of the municipality’s own **combined heat and power plant to 100 % renewable energy**, if possible.

The medium-term goal of LSAP-Dikrich is to transform Diekirch into a **climate-neutral a municipality** as possible.

Implementing the budgeted **photovoltaic systems** on the municipal buildings “Gare” car park and “Al Seeërei”.

Expansion of the “**Zéro Mégots**” project.
